Objective

A hard working 3rd year Computer Science with a clear understanding for optimized and clean software architecture. Looking to use my Programming and hardware knowledge, my experience in problem solving in a position of a Junior Developer where I can be part of revolutionary projects where I can continue to expand my knowledge and express my analytical and critical thinking skills.

Education

Holon Institute of Technology

March 2021 -
present

3RD YEAR COMPUTER SCIENCE

- Data Structures
- Algorithm
- Object-Oriented Programming
- Computer Hardware
- Data Science
- Data Bases

Gimnasia Gan Nahum

2011-2014

SPECIALIZATION IN TECHNOLOGY AND PROGRAMMING

- Programming in Assembly
- Creating Website
- C# programming

Projects

Flight Booking Website

HTML, CSS

- High school Project for HTML class. Website where the user can order a flight.

Zoo MFC Project

C++

- University Project for Object-Oriented Programming class. Created a GUI using MFC.

Flood Prediction Project

PYTHON

- University Project for Data Science class. Flood Prediction using scraping and Machine Learning

Android Application

JAVA

- Android app for making appointment to your barber.

BlockBuster

JAVA

- Managment system for Blockbuster store.

Skills

Technical Languages

C • C++ • C# • Assembly • SQL • PYTHON • HTML • CSS

Technologies/Frameworks

LaTeX • VMWare

Soft

Problem-solver • Critical-thinker • Active-learner • Teamworker

Languages

Russian • English • Hebrew
